Investment Opportunities in Andhra Pradesh

Government of Andhra Pradesh India
“The wealth of the state is its source in the mining and metallurgical industry; the power of the state comes out of these mineral resources”.

by Koutilya – Arthasastra
ANDHRA PRADESH
TREASURE TROVE OF MINERALS

GEOLOGICAL MAP OF ANDHRA PRADESH

Manganese
Bauxite
Apatite
Tungsten
Dimension stone
Baryte
Limestone
Cryotile
Diamond
Gold
Molybdenite
Coal
Mineral Scenario

• Leading Producer of Chrysotile, Asbestos, Barytes, Mica, Feldspar, Quartz, Laterite, Silica Sand, Dolomite & Limestone:
• State Share in value of country’s mineral production is at 11%.
• State endowed with Internationally known black, pink, blue & tan brown varieties of Granites;
• Krishna – Godavari river basin areas have tremendous potential for hydrocarbons – Specially Natural Gas;
Mineral Scenario... contd.

- Gondwana forest belt rich in coal(thermal) deposits; &
- Occurrence of gold & diamond metals rich in Southern parts of the State.
Focus Minerals & Industries

State Government has identified Mining Sector as one of the Growth Engines and the following downstream industries/JV Projects are encouraged under PPP mode for value addition/processing.

- Gold Mining
- Diamond Mining/Cutting
- Oil & Natural Gas
- Alumina/Aluminium
- Titanium
- Refinery
- Granite Cutting & polishing
- Rare Earth Elements
- Beach Sands Minerals

Invitation for MNCs /Investors – Partnership Summit held in June 12
Gold & Diamond Mining in Andhra Pradesh
The State of Andhra Pradesh is known as Ratnalaseema (Land of Diamonds).

Centuries for the best Diamond occurrences.

World known Diamonds like Kohinoor, Peter Regent and hope from the State of Andhra Pradesh.

Diamond areas are spread over 50,000 sq.km. under different environs of the State.
Diamond

Associated with:

Kimberlite - Wajrakarur
Conglomerate- Banaganapalli
Gravel - Krishna Gravel
Gold

Occurrences:

• Southern extensions of Kolar schist belt,
  Chittoor district
• Ramagiri schist belt.
• Jonnagiri schist belt in sheared granodiorite,
  a new geological setup not known earlier.

Estimated resources in Jonnagiri:

1. Dona Temple block  
   0.70 Mt. averaging 4.65 g/t and 2.11m thickness (up to 150 m depth)
2. Dona East block    
   7.93 Mt.at 0.4g/t cut-off up to 180 m depth
3. Dona South block   
   1.113 Mt.
4. Dona North block   
   0.098 Mt.
Initiatives

- Fast Track Clearance of concessions/Licenses/Permissions
- Single Window Approach
- JV Projects with State/Central PSUs & Private Investors under PPP mode for value addition according priority for RP/PL/ML.
- Downstream Industries encouraged under State Promotion Industrial Promotion Policy.
- Placing the systems in Position.
Thank you
