खानों का आरक्षण खंडन के आधार पर

जानकारी: यह खुद की खानों के आरक्षण के लिए लिए गए पानी और खाने के लिए नवीनता है जिसके उपर भाव स्थापित नहीं किया गया है। इसलिए यह माना जा सकता है कि यह अधिकारी का कार्ययोग्य घोषणा में शामिल नहीं है और अब भी रेस्तरां के साथ साथ आयुक्त आचार्य ने सूचना दी है। रेस्तरां के साथ ही रेस्तरां की नीति के अनुसार अन्य सूचना भी दी गई है।

इस संबंध में निचले महीने ही तक हुई बैठक में तब किया गया कि अर्थशास्त्र के लिए आरक्षण के लिए आयुक्त आचार्य ने अधिकारी के लिए नवीनता खाना अधिकारी बनाने के लिए कार्ययोग्य है। उन्होंने रेस्तरां के साथ साथ साथ साथ आचार्य ने कोई नीति निर्देशन नहीं दी गई।

इसमें विभिन्न श्रेणियों के लिए आरक्षण पानी का विवरण देखने के लिए अधिकारी के लिए नवीनता के साथ साथ साथ आचार्य ने नीति में शामिल नहीं किया। अधिकारी श्रेणियों के पानी के पानी पर आवेदन नवीनता प्रकाशित होने के 30वें दिन से 60वें दिन तक प्राप्त किया जाएगा। आवेदन को जाने के लिए आवेदन केन्द्र खाने से अधिकारी के लिए नवीनता खाने अधिकारी के लिए जिला कंट्रोलर श्रेणी के प्रशासनिक, कार्यालय से कार्यालय में ग्रामीण कार्यालय प्रशासनिक की कमेटी द्वारा लाइटर निकाली जाएगी। इस प्रस्ताव को बढ़ाने के लिए अधिकारी के अंदर खाने का समावेश किया जाएगा। यह भी तब किया गया कि अधिकारी श्रेणियों के लिए आवेदन पर आवेदन पत्र में जाने के बाद मुख्य कंट्रोलर श्रेणी के लिए वतद कोई अवधारणा पत्र नहीं आता है तो उसे श्रेणी के रेस्तरां भर भर नहीं माना जा सकता। यह पत्र अंतिम बार नीतियों से निलंबित किया जाएगा।
Maharashtra's VAT refund scheme

Maharashtra government, in a bid to give a boost to the developers of special economic zones (SEZs) in the state, on Wednesday decided to introduce a scheme for reimbursement of payment of value added tax (VAT), exemption in the payment of non-agriculture tax and the waiver in the recovery of royalty charged on minor minerals.

Inquiry into illegal mining in Goa begins

The Justice M B Shah Commission has begun inquiry into the alleged illegal mining and encroachment by mine owners in Goa. The nine-member Commission held a series of meetings with officials of various departments including revenue, mines and geology and forests. Eight different teams have been formed, with each given a list of 12 mines for the inquiry.
EXPERT GROUP TO REVISE ROYALTY ON MINERALS

THE GOVERNMENT will set up an expert group to look into royalty rates, which are due for review next year, for all major minerals other than coal, lignite and sand. The 17-member study group will submit its report in six months. "We are very happy to constitute this group, whose approach will be innovative. It will not only review the royalty rates based on existing Act but will also recommend royalty as per the new mines Bill and the mechanism for its computation," the mines secretary, Mr S. Vijay Kumar, said. The committee will recommend royalty as per the new Bill after taking into account the liabilities on the lease holder as envisaged in draft MMDR Bill, 2011 tabled in the Parliament. — PTI

Shareholders of Cairn vote for accepting govt riders

NEW DELHI, SEPTEMBER 14

An overwhelming majority of over 97 per cent of Cairn India shareholders today voted in favour of company reversing its earlier stand and conceding to pay royalty and cess on its mainstay Rajasthan oilfields.

Cairn India board, however, added a caveat that it will agree to making royalty cost recoverable and pay Rs 2,500 per ton cess on the Rajasthan oil only after partner ONGC issues a no objection certificate to its parent, Cairn Energy's proposal to sell controlling stake to mining group Vedanta Resources.

The company said "an overwhelming majority of 97.29 per cent" of its shareholders had voted for accepting the two conditions that the government had set for approving Cairn Energy's sale of 40 per cent stake in its Indian unit to Vedanta. — PTI
INDIAN FIRMS EYE HUGE
AFGHAN MINING Biz

Kabul, Sept. 14: Despite increasing insecurity in Afghanistan and gunbattles with Taliban rebels in the capital Kabul, Indian firms are bidding billions of dollars for a contract to mine iron ore in a central district of the country. A consortium led by state-run SAIL could invest up to $8 billion in the mine, railroads and a steel plant in a race with China to lock in raw materials for two of the world's fastest-growing economies.

The bid also signals India's intention to remain engaged in Afghanistan long after 2014, when US-led forces complete a pullout. The contract for the Hajigak mines in Bamiyan province is potentially the single biggest foreign investment project in war-ravaged Afghanistan but it could be complicated by Pakistan, which fears closer cooperation between the two.

Ban export of raw minerals, ores: Tribal Minister

Deo says unregulated mining in tribal areas alienating local population, helping Naxals

AMITABH SINHA & RAVI SH TIWARI
NEW DELHI, SEPTEMBER 14

ARGUING that indiscriminate exploitation of mineral resources was leading to alienation amongst local tribal populations and furthering the cause of Naxalite groups, Minister for Tribal Affairs V Kishore Chandra Deo on Wednesday advocated a ban on export of raw materials like iron ore or bauxite.

Mineral resources like iron ore should be declared “national wealth” and their use must be regulated in the larger interest of the country, Deo said in an interview with The Indian Express.

“If we do not regulate the use today, where will we go running when we need them in future? It is only prudent that we use them judiciously and preserve them for future. Unregulated mining in forest and tribal areas is one of the reasons for alienation being felt in local populations there. It is only helping the Naxalites,” Deo said.

“I am of the view that there should be a ban on export of raw minerals and ores. Only what is required for our own economic growth should be mined,” he said.

Deo stressed the need to ensure provisions of Forest Rights Act (FRA) had been properly complied with before forest land was diverted for non-forest purposes like setting up an industrial or mining project. He said he would write to the Environment Ministry to seek a “written certificate” from the state to this effect before granting forest clearance for any project.

The FRA, which came into being in January 2008, asks state governments to recognise the right of tribals and forest dwellers on forest land and grant land ownership certificates to them. “Unless their rights are established and ownership pattas given, how can compensation be decided for forest dwellers or tribals whose land is being taken for a project? I will urge the MoEF to insist on written certificates from the state governments explicitly stating that rights of all affected people had been fully settled in accordance with provisions of the FRA before a particular tract of forest land was diverted for any other use,” Deo said.

Implementation of FRA was one of the issues that troubled big ticket projects like POSCO and Vedanta bauxite mining proposal in Orissa.

Deo said his ministry was working on amendments in FRA rules — if need be in the Act itself — to remove certain impediments in effective implementation of the Act that is considered to be landmark legislation for tribal rights.

The minister said he would soon put forward a proposal to amend the provisions of Backward Region Grants Fund (BRGF) to ensure that a block and not a district was taken as the unit for earmarking funds under this scheme.
Gold gains ₹225, silver up ₹800 on global cues

New Delhi, Sept 14: Snapping its three-day losing streak, both gold and silver gained on the bullion market on emergence of stockists buying at existing lower levels for the upcoming marriage season amid a firm global trend.

While gold went up by ₹225 to ₹28,465 per 10 gm, silver soared by ₹800 to ₹65,000 per kg. Trading sentiment turned better after gold advanced in the global markets as concerns about Europe’s sovereign-debt crisis spurred demand for the metal as an alternate investment. Gold in global markets, which usually sets the price trend on the domestic front, rose by 0.6% to $1,844.98 an ounce in Singapore. In the national capital, gold of 99.9 and 99.5% purity recovered by ₹225 each to ₹28,465 and ₹28,315 per 10 gm, respectively. The metal had lost ₹380 in the previous three sessions.

The rupee slid to its lowest in nearly two years, as worries Europe’s debt problems may snowball into a banking crisis roiled global markets and pushed investors to the dollar’s perceived safety.

The rupee plays an important role in determining the landed cost of the dollar-quoted yellow metal.

Physical buying continued its retreat as traders awaited price falls and stability in rupee to stock for the upcoming festivals and weddings. India is the biggest consumer of bullion followed by China. Wedding and festival demand is expected to gain pace and peak in October and November before tapering off in December.

NMDC submits bid to acquire 50% stake in Australian firm

BY Mahalakshmi

Hyderabad, Sept 14: As part of its first move towards overseas acquisition, the National Mineral Development Corporation (NMDC) has submitted its formal binding bid to acquire 50% stake in Australian exploration firm, Legacy Iron Ore, for an undisclosed amount.

According to informed sources, the company is still negotiating the deal since even while the industry sources estimate the size to be around $40 million.

Legacy said in a filing to the Australian Securities Exchange (ASX) that it has received a formal proposal from NMDC to form a strategic alliance.

Trading of its shares on the ASX were halted till Thursday:

"The company wishes to provide an update on a formal offer received from National Mineral Development Corporation (NMDC) of India regarding a proposal to form a strategic alliance via a cornerstone investment," Legacy said in a statement.

THE COMPANY IS STILL NEGOTIATING THE DEAL SIZE EVEN WHILE THE INDUSTRY SOURCES HAVE ESTIMATED THE SIZE TO BE AROUND $40 MILLION

In May, NMDC had entered into an memorandum of understanding with Legacy Iron Ore to buy 50% stake, which may give access to the India’s largest iron ore producer to Australia’s mineral resources.

Legacy Iron Ore is a Perth-based Australian exploration company established to search for iron ore and gold deposits. The flagship project is the Mt Bevan Iron Ore project located west of Loxton in the central Yilgarn region.

Mt Bevan is a joint venture between Legacy and Hawthorn Resources wherein Legacy will earn a 60% interest in the project by expending a minimum of $3.5 million to develop the project to a pre-feasibility status.

Legacy Iron Ore had progressed initial discussions with NMDC and NMDC had sent independent experts to begin legal, technical and financial due diligence for acquiring a key stakeholding in Legacy. However, due to exploration and drilling data for the Mt Bevan, Hamersley and Robertson Range projects were reviewed by IMC Group Consulting (IMC) in the data room and, for the stage, we feel it’s premature to take any decision,
NMDC TO SUBMIT BID FOR OZ FIRM SOON

New Delhi: All set to make its first acquisition overseas, state-owned iron ore miner NMDC is likely to submit, by month end, the bid to acquire 50 per cent stake in Australian exploration firm Legacy Iron Ore for 200 crore. "This will be our first acquisition abroad. Hopefully, by month-end, it should get submitted," NMDC's director finance, Mr S. Thiagarajan, said. He, however, remained tight-lipped on the size of the deal. "I cannot comment on that," he added.
Gold down as Europe debt woes bolster dollar

Bloomberg

Sept. 14

Gold declined in London as concerns about Europe's debt crisis bolstered the dollar and cut demand for the metal as an alternative asset.

Gold, which reached a record $1,921.15 an ounce on Sept. 6, on Tuesday fell below $1,800 as some investors sold the metal to cover losses in equity markets.

Immediate-delivery gold slipped $1.53, or 0.1 per cent, to $1,832.07 an ounce by 11:12 a.m. in London. Gold for December delivery was 0.3 per cent higher at $1,835.10 on the COMEX in New York.

The metal rose to $1,829 an ounce in the morning fixing in London, used by some mining companies to sell output, from $1,820 at previous afternoon fixing.

Bullion is in the 11th year of a bull market, the longest winning streak since at least 1920 in London, as investors seek to diversify away from equities and some currencies. The metal is up 29 per cent this year, outperforming global stocks, commodities and Treasuries.

Gold exchange-traded-product holdings fell 0.7 tonne to 2,149 tonnes on Tuesday, data compiled by Bloomberg show. Assets reached a record 2,216.8 tonnes on Aug. 8. Silver for immediate delivery was little changed at $41.0075 an ounce. Platinum was down 0.3 per cent at $1,810.75 an ounce. Palladium declined 0.2 per cent to $724.38 an ounce.

BULLION RATES

Mumbai: Silver spot (999 fineness): Rs 65,180; standard gold (99.5 purity): Rs 28,165; Pure gold (99.9 purity): Rs 28,300.

Chennai: Bar silver: Rs 65,130; retail silver: Rs 60,70; standard gold: Rs 28,580; retail ornament gold (22 carat a gm): Rs 2,672.

Kolkata: Silver ready: Rs 65,000; gold ready: Rs 28,660.
Copper slips on fears Greece could default

Reuters
London, Sept. 14

Copper slipped on Wednesday as growing unease about the threat of contagion from the Euro zone debt crisis and fears Greece could default kept investors on edge, although a weakening in the dollar and supply worries helped limit further losses.

Benchmark copper on the London Metal Exchange slipped to $8,740 a tonne in official rings, down from a close of $8,780 a tonne on Tuesday.

But the metal pared losses as the dollar reversed earlier gains to trade flat against a basket of currencies.

Copper prices fell 5.6 per cent in August, their biggest monthly drop since June 2010, and is down 6.4 per cent so far this month.

China accounts for nearly 40 per cent of global copper demand estimated this year at around 19 million tonnes. The US accounts for about 10 per cent of global consumption.

STRIKE THREAT
Uncertainty about supply in light of recent industrial action at top copper mines also helped limit further falls in copper prices. Workers at Peru’s No. 3 copper producer Cerro Verde, controlled by Freeport McMoRan, said they will go ahead with an indefinite pay strike starting on Wednesday.

Among other industrial metals, aluminium traded at $2,366 a tonne in official rings.

Nickel slipped to $21,150 from $21,300 a tonne on Tuesday.

Zinc fell to $2,176 a tonne from a close of $2,193 on Tuesday, while lead slipped to $2,362 from $2,385.

Tin was untraded in official rings, but bid at $23,500 a tonne down from Tuesday’s close of $23,650.
Probe into illegal mining in Goa

Parsi, Sept. 14

The nine-member Justice M B Shah Commission, which is probing illegal mining and encroachment in Goa, has held meetings with officials and eight teams have been formed to look into the allegations. Each team has been given a list of 12 mines in the State which have more than 90 thermoelectric units and that extract around 54 million tonnes of ore annually. The Karnataka’s Chief Conservator of Forests, Mr U.V. Singh, is heading the inquiry panel that will inspect the sites and probe the matter over the next 20 days. ~ PTI
Bellary sponge iron units demand ore supply, uniform price

Owners of factory, staff, truckers and others participate in rally

M. Aliraj
Bellary, Sept. 14

A mammoth rally was taken out in the city on Wednesday by sponge iron manufacturers urging the Union Government and the State Government to ensure that the industry is not forced to close down.

Owners of the sponge iron units, their managerial and clerical staff, and workforce, members of the Bellary district Mines Lorry Owners' Association, and those depending directly and indirectly on the industry participated in the rally. It was conducted under the banner of Bellary-based Karnataka Sponge Iron Manufacturers' Association (KSSIMA).

The rally passed through the main streets of the city and submitted a memorandum to both governments, through the Deputy Commissioner.

Apprehending that the industry would die due to non-availability of ore, the association demanded allotment of iron ore for units and fixing uniform price grade-wise (based ferrous content in the ore), among other things.

Non-availability of ore, due to stopping of mining activities after a Supreme Court order, has put the sponge iron industries in the doldrums since the past several months.

There are around 36 sponge iron units in the district and about the same number in other parts of the State. Over 80 per cent of these units have closed down for want of iron ore. A few, which were running with much difficulty, have also closed down to draw the attention of all the authorities concerned, including the Union and State governments and the judiciary, towards their plight due to the non-availability of iron ore.

The sponge iron units, with an investment of around Rs 12,000 crore, were producing around 12,000 tonnes a day (annual production being over 5 million tonnes after consuming around 11 million tonnes of iron ore). It had provided direct employment to around 20,000 and indirect employment to over a lakh.

"We find ourselves placed in a peculiar situation," Mr T. Srinivas Rao, association president, said while addressing the gathering. "We have set up our industries in the district, which is surrounded by iron ore mines. But, unfortunately, we are unable to get the ore and have been forced to shut down our industries."

The price fixed by National Mineral Development Corporation, the only public sector undertaking permitted by the Supreme Court to extract ore in the district, is exorbitant, he said. The industry would have to face a loss of Rs 4,000 for every tonne of sponge iron produced if iron ore was purchased at that price, Mr Rao said.

The industry, which is small and has been adding value to the natural resources, has been contributing over Rs 3,000 crore a year as revenue to the exchequer in the State and the Centre.

"We hope that the Government would consider our demand and grant captive mines to individual units or to the association to extract ore and share on a co-operative basis to ensure that there would not be shortage of iron ore, or in the alternative, the governments would arrange for adequate allocation of iron ore for the smooth running of the industry, adding value to the natural resources. The association also requests that there be an end to the discriminatory pricing by NMDC for lumps and fines and also the present system of allotment of iron ore to the sponge iron industry," he added.
All that glistens is GOLD

Despite its increasing prices, gold remains to be the favourite with Indian brides and is preferred over diamond jewellery. Ritika Arora reports

There was a time when, for a wedding, an Indian bride was decked up in dazzling gold jewellery from head to toe. All she wanted on her D-day was a large gold necklace or a traditional maharani haar studded with precious stones, kundan and polki that gorgeously enhanced the overall grace of her attire and made her look one in a million.

Later, the world of gems saw a big transition as classy light and elegant jewellery studded with diamonds, pearls, shells, beads and platinum took over peoples’ preferences. But gold never lost its charm and value. And even though gold prices have been forever escalating, it never affected people’s purchasing power. In fact, buying gold ornaments became a profitable investment.

Interestingly, the much-liked traditional heavy and bulky gold neckpieces, rings, danglers and bangles are back in vogue. And without caring much about the hallmark referred gold rates, for the forthcoming wedding season, people are busy queuing up jewellery stores across the Capital for eye-catching traditional jewellery.

The prices of gold have never seen a decline and not affected the people’s purchasing power. During the wedding season, people purchase gold, no matter what. Buying gold ornaments is more like an investment for them so they don’t really mind spending a huge amount in advance because they have this fact clear in their minds that the prices will forever increase and will never see a downfall. Also, traditional gold jewellery designs like geometrical shapes, nature-inspired designs, designs inspired by Gods and Goddesses are back in trend. Typical maharani haars, bulky chains, pendants and danglers, forever famous in tier II cities, are slowly creating a place for themselves here. One can wear these dazzling ornaments not only on weddings but on any other occasion as well,” says Delhi-based jeweller Neeraj Malhotra.

Unlike, last few years when sporting a contemporary piece of jewellery made for a fashion statement, now wearing a bulky piece of gold in traditional design is considered cool and classy. “Designs inspired by peacock motifs, temple jewellery and other designs that have been a part of every grandmom’s jewellery box are back in fashion. While diamond or platinum jewellery is chosen for parties and pre and post-wedding functions, gold jewellery is perfect for the wedding,” feels jewellery designer Anuradha Chhabra and adds gold jewellery studded with pearl, kundan and zirkoni is in demand and a little fusion of traditional and contemporary works too, “but the metal has to be gold and it should have that appeal and traditional touch to it,” says Megha Rawat, Mumbai-based jewellery designer.

Besides the request to create a design that was popular decades back in gold jewellery, jewellery designers say that there is a lot of demand for customisation too. “Earlier, gold jewellery used to come in limited designs, but now there is a lot of scope and options available and therefore its demand among the modern brides has seen a rise,” concludes Delhi-based jeweller Ashok Goyal.
A mining scam on the lines of the Karnataka mining scandal could soon come to light, with the Justice MB Shah Commission officially extending its probe into alleged illegal mining in the State.

The inspectors have been divided into teams that will inspect 12 mines each of the 90-odd leases operational in Goa, officials of the State mines department informed.

The exercise is being carried out as part of the probe into illegal mining that has engulfed Goa along with it and is being coordinated by Karnataka’s chief conservator of forests UV Singh, who is part of the Commission’s nine-member team, the official said.

Singh was one of the officials responsible for collecting and collating the data which led to the exposure of the Karnataka mining scandal. The panel, which has been appointed by the Centre to probe illegal mining across the country, under the Commission of Inquiry Act, last year and was given 18-month time to submit the report.

“They are expected to be conducting site visits and inspection and collecting data for nearly three weeks in Goa,” the official said.

Justice MB Shah, who heads the Commission, is also expected to visit the State, this week to oversee the operations.

The Commission is expected to look into violation of Wildlife Conservation Act, Forest Acts as well as carrying out mining more than what is permitted.

Goa has been repeatedly rocked by the illegal mining scandal with a legislative committee, the public accounts committee, earlier this month putting out to a ₹1,200 crore scam, involving seven million metric tonnes of iron ore.

Leader of Opposition Manohar Parrikar has accused Chief Minister Digambar Kamat as well as several Cabinet Ministers of being part of the illegal mining scandal. Goa extracted nearly 54 million tonnes of iron ore the last financial year.

40% of the management time is spent on writing reports and up to 60% of it in attending meetings in ‘complicated’ organisations. According to a Boston Consulting Group study, complicatedness of companies in US and Europe has been increasing by an annual rate of 7% for the past 15 years. Managers in these companies are unable to spend enough time with their teams.
