IITF: Showcasing Clean And Energy Efficient Steel Technology

In the fortnightly fair which begins here, the Steel Pavilion is based on the contemporary theme of Clean and Energy Efficient Technology Products & Services. Speaking on the occasion, AS & FA Mr. Nathan said, "It is indeed a pleasure to note that like the preceding years, the Steel Pavilion of the Ministry of Steel, Government of India, has found its pride of place in the IITF in 2010. Steel Pavilion has been able to make a mark of its own and has helped demonstrate to all, the supreme versatility of steel."

The pavilion showcases the manufacturing facilities and the range of products & services catered by companies under the Ministry of Steel, namely: Steel Authority of India Limited (SAIL), Rashtriya Ispat Nigam Limited (RINL), NMDC, MOIL Limited, MSTC Limited, Ferro Scrap Nigam Limited (FSNL), MECON Limited, Hindustan Steelworks Construction Limited (HSCL), KIIC Limited, Bird Group of Companies, Joint Plant Committee (JPC).

Besides, three private steel producing companies - Tata Steel, Jindal Steel & Power Limited and Monnet Steel & Energy Limited, have also showcased their products and facilities at the pavilion. Laying emphasis on environment friendly methods of production and adherence to Clean Development Mechanism, the pavilion clearly shows how steel is the backbone of nation.

IITF has been one of the most prominent hubs for showcasing Indian Steel. With the energy-intensive Indian Steel Industry taking rapid strides towards capacity expansion and modernization, the theme for Steel Pavilion could not have been more fitting.

India ranked as the 3rd largest steel producing country in the world map in 2009. As per the latest forecast by World Steel Association (WSA), India will emerge as the growth driver for world steel industry. Considering that the Indian steel industry grew by over 12%, this momentum is expected to be maintained in the coming years. India is also set to emerge as the second largest producer of steel by 2015-16.

Recognising the importance of Indian steel industry, WSA has planned to hold its annual meeting for 2012 in India. Indian steel has marked a special place of its own in the global steel market and with an estimated crude steel production over 200 million tonnes by 2020. One of the challenges likely to be faced by the industry is the need to ensure energy efficiency - a process which starts right from the choice of process route and selection of technology and associated raw materials.

By addressing critical issues such as these, and by simplifying technology for a global audience in a creative and innovative style, Steel Pavilion is set to draw crowds and educate Indian people about the latest and cleanest technologies in use.

Interestingly, Steel Pavilion of IITF 2010 has a lot more in store for visitors than just steel. Various shows have been organized for the entertainment of people such as magic shows, music-band quizzes, talking dolls etc on a daily basis.

The inaugural function of the Steel Pavilion was also marked with a cultural programme where professional dancers danced to the tune of south Indian classical music to create a melodious beginning.
Early to work, govt aims to spread out selloffs next year

To Identify 8-10 PSUs Early So That There Is No Repeat Of Year-End Rush

The disinvestment department has begun work on the stake sale programme for the next fiscal year, ahead of consultations with the budget division of the finance ministry that will firm up the selloff target.

“We will identify 8-10 public sector firms for the next fiscal,” said a senior official with the finance ministry.

“Once that is done, the process can be initiated and the companies and administrative ministries could be informed,” he said, requesting anonymity.

Although the government is expected to raise the targeted ₹40,000 crore from share sales, the delay in rolling out the plan created a situation of a number of offers getting bunched together towards the end of the year.

“The companies can start the process for meeting the listing criteria, such as induction of independent directors,” the official said.

The divestment process could begin with a big bang sale in ONGC next year, but the government’s emphasis may be on taking unlisted companies to the market.

“The criteria remain the same. We would like to unlock the hidden value of the companies, which are not listed or have little public shareholding,” the official said. The list of unlisted PSUs features names such as Cochin Shipyard, NBCC, Hindustan Latex and Rashtriya Ispat Nigam.

“The disinvestment will allow state-run companies to offer equity to employees as incentive,” said UD Choubey, director general of SCOPE, the apex body of public sector companies.

SCOPE is already organising meetings of chief executives of public sector enterprises with government officials and investors to facilitate the divestment process.

The companies that are expected to hit the market include heavyweights BHEL, Container Corporation of India, MMTC, Power Finance Corp, Neyveli Lignite Corporation, Bharat Electronics, and Nalco.

The government had decided to go in for share sale in around 9 companies in 2010-11. It has, so far, managed four companies including Coal India. The other issues in the offing are SAIL, Shipping Corporation and oil marketing major Indian Oil Corporation. The finance ministry will look to raise a large sum in 2011-12 through divestment, considering the 4.5% fiscal deficit target it has set for the year. In 2009-10, the government raised ₹25,000 crore through sale of shares in Oil India, NMDC, REC and NTPC.

“We would also look at suggestions from various administrative ministries. Follow-on public offers in some big companies such as BHEL and Concor cannot be ruled out,” the finance ministry official said, adding that a final call on the proposed disinvestment in such companies will be taken once a target is finalised.
सेल की खदानों के उत्पादन में लगातार वृद्धि

राष्ट्रीय अभियान सेलिंग (सेल) के द्वारा राष्ट्रीय निरीक्षण की तीन अयोग्य खदानों से वर्तमान वित्तीय वर्ष के अग्रिम ज्युल्यु लाख 95 लाख तीसरे अयोग्य का उत्पादन हुआ है जो पिछले वित्तीय वर्ष के समान अवधि की तुलना में 35 की प्रतिशत से ज्यादा है। राष्ट्रीय रंगीला निरीक्षण के संभाल मुख्य ए. के. दीक्षा ने बताया कि खाराखार यथिक गुण और नियमात्मकता-खदानों ने तीन अयोग्य के उत्पादन में कमाया 15.6 प्रतिशत और 6.6 प्रतिशत की विशेष वृद्धि की है। इसीसे समय बाहर खदान ने भी 12.7 प्रतिशत की वृद्धि दिखाई है। उत्पादन में वृद्धि करने से सेल के के बोथ, गुर्गुर, राजस्थान, और बर्मुंड विश्व इमारत संयंत्रों में तीन अयोग्य का सम्पूर्ण भंडार बना है।
It’s no-go for Ramesh in Cabinet

Chetan Chauhan

NEW DELHI: Environment minister Jairam Ramesh may find himself isolated on go and no-go areas for coal mining, with the coal ministry getting overwhelming support for its proposal to restrict no-go areas to 10 per cent of forestland.

At least six central ministries, which submitted comments on the coal ministry’s note for the Cabinet Committee on Infrastructure, had termed Ramesh’s stand unjustified and an impediment to economic growth.

The environment ministry has given six reasons why the coal ministry’s proposal is not a good idea. It said accepting the proposal would have an adverse impact on forests and wildlife, ignoring the classification could result in judicial intervention, and would go against the spirit of forest conservation law open floodgates for similar requests from other ministries.

The coal ministry hit back saying diverting only 0.75% of India’s total forestland cannot jeopardise the country’s intricate bio-diversity, ecological and watershed characteristics.

"Coal seams are contiguous to existing operational areas and segregation is not practical," the coal ministry responded.

The coal ministry also said that the average pendency period for getting forestry clearances range from three to six years. Though the statutory requirement is 150 days. It includes a large number of coal blocks, which are in go-areas as per the environment ministry’s classification. The environment ministry, however, said any delay is because of submission of required documents and as many as 233 projects of Coal India have been approved.

The Planning Commission, from where Ramesh had expected support, believes the coal ministry is right. “In case there are concerns on wildlife and forestry, necessary stipulations about providing protection and investments in forestry may be made while granting approvals,” the panel said, stressing a better monitoring mechanism to ensure environment management plans are implemented.

Among various ministries supporting coal, the steel ministry has given most the vehement support, saying that the steel sector had to import 24 million tonnes of coking coal as against 16.84 million tonnes domestic production.

The power ministry, whose electricity generation target depends on coal extraction, has termed Ramesh’s classification as illegal, saying it will adversely impact power generation capacity of 130,000 MW, which depends on coal.
SAIL’s Avijit is Pranab’s sonrise in West Bengal

BIDYUT ROY

KOIL KATA, NOVEMBER 17

THE West Bengal Assembly elections are still some months away, but the Congress may already have finalised its candidate for at least one seat. Avijit Mukherjee, son of Union Finance Minister Pranab Mukherjee, is set to start in his father’s profession - contesting his first election from Nalhati in Birbhum district.

State Congress spokesman Sukhendu Sekhar Roy said Avijit Mukherjee’s entry into politics cannot be announced officially until it is decided exactly how he can reconcile his current professional status as an employee of a public sector undertaking with a career in politics.

“But it would be a welcome development because Pranabda is playing a decisive role in Indian politics. If his son comes into politics, we should congratulate him,” Roy said.

CONTINUED ON PAGE 2
A new Mukherjee in Bengal

Avijit Mukherjee, 52, is an engineering graduate from Kolkata’s Jadavpur University, and currently a general manager with Steel Authority of India Ltd (SAIL). He lives in Delhi with his homemaker wife Chitralekha. Their children, a son and a daughter, study in the UK.

Mukherjee was in Nalhati on November 3, where he attended a Vijayadashami ceremony hosted by Asit Mal, the Birbhum district president of the Congress. Mal requested Mukherjee to enter politics. Mukherjee is learnt to have told Congress workers that he will start meeting with members of booth-level committees from the second week of December.

Local Congress sources, however, said it would be difficult for Mukherjee to win the seat without the cooperation of Biplab Ojha, a powerful Trinamool Congress leader from the area, and an aspirant for the Trinamool ticket. Nalhati has voted Forward Bloc in every election since 1977; however, in the Lok Sabha elections of 2009, the Trinamool led the Nalhati segment by over 10,000 votes.

Ojha, Birbhum district secretary of the Trinamool, said, “I have also heard that Avijitabu may contest the election from Nalhati. Let us see what happens in the next few days.” But added, “If we (the Trinamool) can forge an alliance with the Congress, I must work for Avijitabu.”

State Congress sources said senior party leaders who have interacted with Mukherjee feel that he will be able to deliver. Leaders close to Mukherjee said that despite not being in politics, he keeps a close watch on all political developments.

“We will get a new face once Mukherjee joins politics. Obviously this is a positive development for the Congress,” Sukhendu Sekhar Roy said. Manas Bhuniya, president of the West Bengal Pradesh Congress Committee, said, “I welcome Mukherjee’s decision to enter politics.”

Mukherjee himself, when contacted, said, “I am still an employee of a government-run organisation. I should not speak about politics right now.”

CIAL to set up 2 MT steel plant

JAMSHEDPUR: Corporate Ispat Alloys Ltd (CIAL), a unit of Abhijeet group, is setting up a 2 million tonne steel plant. The pellet-based plant will come up at adjoining Kharswan. CIAL managing director Abhijeet Jayaswal said Rs 10,000 crore will be invested to set up the plant over 4,000 acres and would be commissioned by 2012. ENS & PTI
CIAL to set up steel plant in Jharkhand

Corporate Ispat Alloys Ltd (CIAL), a unit of Abhijeet group, is setting up a 2-million tonne steel plant, whose foundation stone was laid on Wednesday by visiting President of Mauritius Anerood Jugnauth and Jharkhand Chief Minister Arjun Munda.

PTI
JSSL to invest ₹300 cr to expand its Bellary unit

DEBASHIS MOHAPATRA
Vijayanagar (Bellary), 17 November

JSW Severfield Structures Ltd (JSSL), a joint venture between Mumbai-headquartered JSW Steel and UK-based Severfield Reeve Structures, plans to invest around ₹300 crore for expanding the capacity of its Vijayanagar unit.

It also plans to spend ₹200 crore for setting up new specialty steel plants in West Bengal and the Delhi region in the next two years. These plants will fabricate steel into special structures, which will cater to the need of construction and infrastructure sectors.

"We are planning to set up new units in the Delhi region, along with West Bengal, in the next two years to promote steel structures in the construction of buildings," Sajjan Jindal, vice-chairman and managing director of JSW Steel, said. He was speaking to reporters after the inauguration of JSSL's plant in Vijayanagar.

In the first phase, the Vijayanagar unit can produce 35,000 tonnes of fabricated steel a year. The capacity will be expanded to 90,000 tonnes in a year. Jindal said while the investment for setting up the unit was around ₹200 crore, the company would infuse ₹300 crore more for expanding its capacity.

JSW Vice-chairman and MD Sajjan Jindal said: "We are planning to set up new units in the Delhi region, along with West Bengal, in the next two years to promote steel structures used in construction of buildings."

According to Jindal, JSSL has orders worth ₹70 crore. He said the company has already received large orders from four clients as of now and is receiving many enquiries from clients.

JSSL will cater to the domestic demand. On JSW Steel's upcoming plant in West Bengal, Jindal said JFE Steel had shown interest in investing.
Essar Steel to expand retail outlets

ESSAR Hypermart, the country’s first steel retail chain from Essar Steel, has an ambitious plan to expand its retail outlets across India from the current 500 to 770 by March 2011. Presently, the company has 44 outlets in Tamil Nadu and Pondicherry which will be increased to 68 by March 2011.

Sharing the above information with the media, Girish Rao, CEO, Essar Hypermart, said that his company mostly catered to the SME segment.

“Tamil Nadu continues to be one of our premier markets. Being one of the most industrialised states and fastest growing economies, the growth of SME sector in the state has remained phenomenal. We have plans to further expand our retail network down south,” he added.

In the recent times, Essar Hypermart has launched two innovative products to widen its portfolio. PPCI (colour coated) sheets and coils have been launched in the Hypermart channel to increase the company’s penetration in the fast growing high value roofing segment.

Essar Hypermarts sales currently account for 25 per cent of Essar Steel’s annual revenues.

“Customers can now buy steel at the right price, excellent quality and timely delivery from within their town/city limits, thus Essar Hypermart strongly abides by its motto of ‘Sahi price, Sahi delivery, Sahi quality’,” Girish Rao noted.
JSW Steel sets up plant in Bellary

AGE CORRESPONDENT
VIJAYANAGAR, (BELLARY)

Nov. 17: While developed economies in the West are home to good looking, longer lasting and cost efficient, multi-storeyed buildings made of structural steel, India is lagging with concrete buildings, as there are no manufacturers of structural steel to cater to the growing needs of the construction/infrastructure sectors in the country, said Mr Sajjan Jindal, vice-chairman and MD of JSW Steel Ltd, at the inauguration of its specialty steel plant in Vijayanagar, Bellary district on Wednesday. The ₹200 crore plant set up by JSW Severfield Structures (JSSL), a 50:50 joint venture between JSW Steel and UK-based Severfield Reeve Structures will address the needs of the booming construction and infrastructure market. In the initial phase, the plant will produce 35,000 tonnes of fabricated steel, which will further be expanded to produce 90,000 tonnes per annum over the coming year.
Posco to stay in Orissa: Govt

Nagashwar Patnaik
Bhubaneswar

The Orissa government on Wednesday asserted that Posco would not pull out of the state despite halting of work on the Korean company’s proposed Rs 51,000-crore steel project, following allegations of violation of green norms.

“We have not received any (pullout) proposal from the company. The South Korean company may have a separate proposal in Karnataka. That does not mean the company is pulling out of Orissa,” state steel and mines minister Raghunath Mohanty told ET. A Posco-India spokesman said the steel major had already signed an MoU with Karnataka government for setting up a 6 mtpa steel plant in that state.

Claiming that the state government had been carrying out its work for implementing the 12 million tonne steel project, Mr Mohanty said about 1,000 acres of the promised 4,000 acres has already been acquired when the union ministry of environment and forest issued a ‘cease work’ notice based on the N.C. Saxena Committee report.

The Orissa government was hopeful that the South Korean steel major would set up the greenfield steel mill after getting a clearance from the environment ministry.

The state government is ‘carefully’ examining certain legal aspects that are likely to stand in the way of immediate renewal of the MoU. “The MoU will be renewed in due course as per the regulations,” the minister said when asked about the fate of the MoU renewal.

Section 18 of the agreement says that Posco should sign an agreement within six months of getting registered as a company. But the company has not done this till today. Besides, the MoU prescribes that land acquisition must be completed within a period of five years from signing the MoU.

The government’s fear emanates from the fact that a small mistake in the MoU renewal could provide fodder to the Opposition, human rights activists and others. Billed as the largest foreign direct investment proposal in the country so far, the Posco project has failed to take off because of protests by local inhabitants and political delays.
Salem Steel Plant (SSP), a unit of Steel Authority of India Limited (SAIL), has won the prestigious National Sustainability Award for the year 2010 from Indian Institute of Metals (IIM).

Virbhadra Singh, Minister of Steel, Govt of India, gave away the award, which was received by Pankaj Gautam, Executive Director, on behalf of Salem Steel Plant, at a glittering awards function during the 48th National Metallurgists’ Day celebrations at Bangalore.

SSP has won the first prize amongst the Secondary Steel Plants/Alloys Steel Plants category for the year 2010. Salem Steel Plant has bagged this award consecutively for the 7th time and 14th time since inception of this award in the year 1991. The award symbolizes SSP’s commitment to quality and the value of its brand, Salem Stainless.

14th November is celebrated as the National Metallurgists’ Day, as a tribute to the important role played by metallurgists in the industrialisation and economic development of India. The Ferrous Division of the Indian Institute of Metals has been organising the National Quality Competition since 1991 to encourage the quality control aspects in the steel sector.
JSW structural steel unit on stream

V. Sridhar

TORANAGALU: The ‘severe shortage’ of special steels for building airports, railway stations, stadia and other large structures has prevented architects from using more steel instead of concrete in infrastructure projects, said JSW Steel Vice-Chairman and Managing Director Sajjan Jindal on Wednesday.

Speaking at the inauguration of JSW Severfield Structures’ new specialty steel plant here, about 30 km from Bellary, Mr. Jindal said the 50:50 joint venture between JSW Steel and U.K.-based Severfield Bowen had already raised orders worth about 10 million pound (Rs.80 crore).

“We expect the order book to double within two weeks,” said Severfield Chief Executive Officer Tom Haughey.

Mr. Haughey said the 35,000-tonne per annum plant was mostly aimed at meeting the requirements of the domestic market. The plant, employing about 250 persons, was already supplying steel for a heavy industry unit, a power plant, a commercial office building and a residential complex, he added. The plant, established at a cost of 25 million pound (Rs.200 crore), was likely to be expanded to 90,000 tonnes annually in phase two of the project.

Mr. Haughey said the company would be utilising expatriate labour from Dubai initially to work at the construction sites. “This will cut our learning curve sharply,” he said. Mr. Haughey pointed out that while in the U.K. steel accounted for about 60-70 per cent of the ‘construction spend,’ it was only 5 per cent in India.

Mr. Jindal said the joint venture was exploring the possibility of establishing plants with similar capacities for supplying markets in the North and the East. “We may establish a plant in West Bengal,” he added. He said the joint venture had the advantage of being able to source steel from JSW Steel, which would reduce delays for supply for projects. Steel used in structural could reduce cost and time delays and enable structures to be earthquake-resistant, he added. The per capita consumption of steel in India was only 60 kg, compared to the global average of 200 kg and 400 kg in China, he pointed out.
राज्य से बाहर नहीं जाएगी पॉर्टफोलो: उड़ीसा सरकार

भवनेश्वर: उड़ीसा सरकार ने बुधवार को कहा कि परिस्कर्तों की हिंदी की राज्य से बाहर नहीं जाएगी पॉर्टफोलो। राज्य त्रस्त निर्माण नियमों के प्रकाशन का बयान से कंपनी के प्रस्तावित प्रोजेक्ट पर सेंट लगा गया है। राज्य के मुख्य मंत्री राज्य निर्माण मंत्री श्री मोहनदीप ने कहा कि 'पारसी के पास कार्यक्रम के लिए अलग से स्थल है, इसका महत्व यह नहीं है कि कंपनी उड़ीसा से बाहर जा रही है।' पारसी के दिनों के प्रदर्शन का कहा कि कंपनी पहले ही कार्यक्रम सरकार के साथ 6 एयरपोर्ट एवं लाभ उत्पादक स्टील एलाइट के लिए प्रस्ताव पर हस्ताक्षर कर सकती है।

उड़ीसा सरकार ने कहा कि कार्यक्रम प्रोजेक्ट का उड़ीसा के पहली के नवरीत वाले प्रोजेक्ट से होना चाहिए।
JSW Severfield Structural\s kicks off production

To produce 35,000 tonnes of fabricated steel in Karnataka

Suresh P. Iyengar
Vijayanagar, Nov. 17
JSW Severfield Structural\s (JSSL), the joint venture of JSW Steel and the UK-based Severfield Reeve Structures, has begun production at its plant here.

The capacity planned is 35,000 tonnes of fabricated steel. Steel plates and galvanised products will be sourced from JSW's steel plant at Vijayanagar. The company will provide complete solutions, including designing, fabrication and erection of steel buildings.

Mr Sajjan Jindal, Vice-Chairman, JSW Steel said the company would ramp up capacity to 45,000 tonnes at a marginal investment if demand peaks. The partners have invested Rs 200 crore, with another Rs 100 crore on the anvil which will see capacity increase to 90,000 tonnes by 2012.

"We wanted to promote use of steel in India where per capita consumption is just 60 kg/person against the world average of 200 kg. China consumes 400 kg (per person), while Korea has the world's highest consumption at 1,400 kg," he said.

Less than 5 per cent of the steel produced here is used in the construction sector, compared to 50-75 per cent in the UK and Europe.

Orders
JSSL has bagged orders worth Rs 70 crore in the last two months, and expects this to more than double if active enquiries worth about Rs 500 crore materialise.

It has also bagged orders for a 17-storey building in Bangalore, 21-storey in Mumbai and industrial projects.

The company also plans to open a satellite plant either in Kolkata or Delhi in the next three months at an investment of Rs 200-300 crore.

Mr Tom Haughey, Chief Executive Officer, Severfield-Rowen Plc, which owns Severfield Reeve Structures, said the potential in India was enormous, considering that less than five per cent of the steel produced here is used in the construction sector, compared to 50-75 per cent in the UK and Europe.
Posco not to pull out, says Orissa minister

The Orissa government on Wednesday said it is unlikely that Posco will pull out of the state because of halting of work at its proposed Rs 51,000-crore steel project following allegations of violation of green norms. "There is no such proposal from the company. They (Posco India) might have a separate proposal in Karnataka. That does not mean the company is pulling out of Orissa," steel and mines minister Raghunath Mohanty said. He added, "Prime Minister Manmohan Singh, South Korean President Lee Mung-Bak and Orissa chief minister Naveen Patnaik have agreed to implement the project." A Posco-India spokesman said it had signed an MoU with Karnataka for setting up a 6 mtpa steel plant there, but that had nothing to do with the port-based project near Paradip in Orissa.
Posco mulls facility in Maharashtra

May set up cold-rolled unit at an estimated $500-m investment

Our Bureau
Kolkata, Nov. 17

Is Maharashtra emerging as a favourite destination for Posco, the world’s number three steel maker?

Steel industry sources, quoting foreign agency reports, suggest that the Korean steel giant is considering setting up a cold-rolled steel manufacturing facility to cater to the growing demand from automobile and home appliances market.

The capacity of the plant is estimated at 1.8 million tonnes and investment at $500 million.

The final approval of the Posco board, particularly of the investment committee, is still awaited, it is learnt.

The work, if it is indicated, might start next year subject to the approval of the board.

In March this year, Posco had indicated its plan to invest $250 million to set up in Maharashtra a steel galvanising plant with an annual capacity of 450,000 tonnes.

ORISSA PLANT
Meanwhile, Posco’s proposed $12-billion steel plant in Orissa, billed as India’s biggest foreign direct investment, awaits Environment Impact Assessment report by an expert committee. The panel’s recommendation, though not binding but required by the Environment Minister before announcing a decision, is expected shortly.

The project has been delayed by protests and environment reports. It also faces an unrelated problem in the form of a court case filed by a local firm in Orissa against the Orissa Government challenging the concession granted to the Korean firm, as the company had also bid for it. The Karnataka Government too is courting Posco with an offer of iron ore mining rights as well as land. If Karnataka succeeds in its move, Orissa may lose the project.
오디शा से नहीं हटेगी पॉर्स्को : सरकार

इंदिरा मुखर्जी

오디शा सरकार का कहना है कि पॉर्स्को-इंडिया एक्झेंसन संबंधी नियमों के लिए आपेक्षिक प्रतिस्पर्धा 51,000 करोड़ रुपये की इकाइयों पर निर्भरता रुपये के बाहर नहीं जाएगी। इसका और खानन मनी सूचीत की जाएगी और कम बस्तियों के लिए ऐसा कोई प्रश्न नहीं है। ही सवाल है कि पॉर्स्को ने कनर्ट में एक अलग प्रश्न रखा या?

इसका यह अर्थ नहीं है कि कंपनी औद्योगिक से बाहर जा रही है। गोरखपुर है कि पॉर्स्को इंडिया के एक प्रवक्ता के कहा या कि इसके क्षेत्र का यह अद्यावधी नियंत्रण के करीब स्थापना का लिए सबसे एक सही फलों पर हस्ताक्षर कर सकता है। कनर्ट के नियंत्रण का औद्योगिक के पार्टी के निर्माण कंसर्वेज बनाए रखने में कोई लेना-देना नहीं है।

एनएसईल के की-कॉपर सेवा शुरू

इंदिरा गुप्ता नेशनल स्टाइल एक्सप्रेंज़ (एनएसईल) ने सोने और पाँच के अंतर्निष्ठ बिजनेस के लिए एन-पीए एवं एन-सिल्फर सेवा के नाम प्रचार कर नवेंद्र की नवीन की रूप आप कर दी।

एनएसईल की ओर से जारी बिजनेस के मुख्य बाजार 2011 तक उसके इस प्रचार की शुरुआत में देश में सिर्फ निर्मिति की रकम 20 बार की नोटिश की राशि बनाई है। गोरखपुर है कि इंडिया के क्षेत्र में निर्माता को कमी प्रमाणित के लिए अन्य निर्माता की रूप के विलक्षण उत्पादन करते हैं।

यह रोशन भी इनस्टीटुट के क्षेत्र में चलता रहे को ताफा करती है।
